Complications of Oviposition in Psittacine Birds: Diagnosis and Management

FREE, live, interactive LafeberVet webinar
RACE approved for 1 credit hour

Presenter: **Don Harris**, DVM

Wednesday, **December 9**
2 pm EST (New York) (UTC -05:00)

What time is this in my time zone?

REGISTER NOW

Although there are many forms of reproductive disease in captive psittacine birds, the condition most encountered is dystocia or egg binding, which will be the focus of this presentation. This seminar will explore the clinical presentation of dystocia in birds, including history, clinical signs, and physical examination findings, as well as conservative and aggressive management techniques. There are many approaches to resolving the condition of egg binding. Drawing upon his 45 years in clinical avian practice, Dr. Harris will share methods that he has found to be safe and effective.

Learning objectives

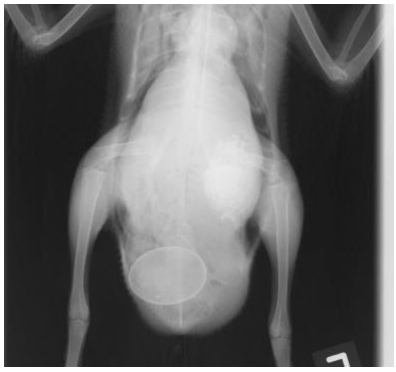

Photo: Dr. Alyssa Scagnelli

- Clinical presentation
  - Subjective parameters: Clinical signs, history, sex
  - Objective: Sex, posture, palpation, imaging
- Conservation management techniques: fluid therapy, calcium, humidity, soaking, PGE2α
- Aggressive management techniques
  - Cloacal implosion/extraction
  - Percutaneous implosion
  - Salpingohysterectomy

About LafeberVet

LafeberVet is a free, ever-growing online library of exotic animal medicine continuing education resources, videos, articles, client education material, forms, and more. Provided by Lafeber Company, LafeberVet is for veterinarians, veterinary nurses, wildlife rehabilitators, students in these fields, and allied professionals.

About Lafeber Company

Lafeber Company was built by a father-son team of veterinarians with a shared love of animals and a special passion for birds. Dr. T.J. Lafeber developed the very first commercial bird food pellets in the back room of his veterinary clinic in the early 1970s. Today, our exotic animal foods and critical care formulas are developed by his son, Dr. Ted Lafeber III, his granddaughter Nadine Lafeber, along with top veterinarians and nutritionists. An independent laboratory tests every diet to ensure optimum nutrition for pet health. Lafeber Company also consults leading experts in behavior so that our foods promote dietary enrichment.
